PROFESSIONAL SUMMARY

Computer Science Undergraduate with a foundation in web and application development, data structures, database management, and SDLC concepts. Familiar with React.js, Node.js, MongoDB, Java, SQL, and Git through developed academic projects, interested in building practical software solutions and continuously expanding technical knowledge.

TECHNICAL SKILLS

Languages:	Java, JavaScript
Frontend:	React.js, HTML, CSS, Tailwind CSS, Flutter
Backend:	Node.js, Express.js, REST APIs, WebSocket
Databases:	MongoDB Atlas, MySQL
Tools:	GitHub, Postman, Render, Vercel

EXPERIENCE

M7 Corporation Pvt Ltd

Chennai, India

App Developer Intern

Feb–Mar 2026

- Gained hands-on experience in production-level application development, including Agile workflows, software testing, debugging, bug fixing, QA processes, and post-deployment maintenance within a collaborative development team.
- Learned practical knowledge of GitHub Desktop, Git-based version control, state management, API integration, and modern application architectures, while working with industry-standard tech stacks and development practices.

PROJECTS

AlgoLens – Chrome Extension for Programmers

React.js, TypeScript, Tailwind CSS, Node.js, Express.js, OpenRouter AI

- Competitive programmers on coding platforms wasted time manually searching for hints and explanations across multiple tabs, breaking their problem-solving focus.
- Built a Chrome extension that auto-detects coding problems and delivers AI-powered hints, complexity analysis, and solutions directly within the coding interface.
- Integrated OpenRouter AI API with a progressive hint system using React + TypeScript frontend, structuring responses into hints → algorithm explanation → complexity analysis → full solution on demand.
- Delivered sub-100ms UI response with zero manual setup, enabling uninterrupted in-browser problem-solving across LeetCode and similar platforms.

DebtBook – Debt Management Mobile Application

Flutter, Riverpod, GoRouter, Node.js, Express.js, MongoDB Atlas, JWT, REST API

- Retail shop owners tracked customer debts manually using paper or spreadsheets, leading to errors and no real-time visibility into outstanding balances.
- Designed and developed a full-stack mobile application to digitize debt tracking, supporting multiple customer accounts with secure multi-user access.
- Built 10+ JWT-authenticated REST API endpoints with input validation and role-based access control, implemented real-time customer search and automatic balance recalculation using Riverpod state management.
- Deployed backend on Render with a keep-alive cron-job strategy eliminating cold-start latency, distributed the app via APK, delivering a production-ready debt management solution.

InternTrack—Full Stack Internship Tracker

React.js, Node.js, Express.js, MongoDB Atlas, JWT, Tailwind CSS

- Built a full-stack internship tracking platform to streamline application management, implementing JWT authentication, REST APIs, and a six-stage hiring workflow for organized tracking.
- Developed interactive dashboards with React and Recharts to analyze application trends, status distribution, and pipeline progress, enabling data-driven monitoring of job applications.
- Automated email reminders and notifications to help users track deadlines and follow-ups, improving application management efficiency and user engagement.
- Deployed and maintained the application on the cloud, implementing secure backend services and database integration to ensure reliable performance and scalability.

EDUCATION

St. Joseph's College of Engineering, Chennai

B.E. Computer Science and Engineering

2022 – 2026

CGPA: 8.56/10

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ problems on LeetCode covering arrays, trees, graphs, and dynamic programming.
- Solved 200+ problems on GeeksforGeeks and 800+ problems on Skillrack
- Certifications in Programming in Java: NPTEL(2024), Database Management System: NPTEL(2025), Flutter: IBM(2026)
