

KAPILSURIYA K

Chennai, India

suriya23k@gmail.com — 6381102741 — GitHub — LinkedIn — Portfolio

PROFESSIONAL SUMMARY

Computer Science Graduate with hands-on experience building and deploying full-stack web and mobile applications using React.js, Node.js, Express.js, MongoDB, Flutter and Git. Strong foundation in data structures, DBMS, REST APIs, and SDLC Concepts. Looking to work on production-level Software Projects & Technologies.

TECHNICAL SKILLS

Languages:	Java
Frontend:	React.js, HTML5, CSS3, JavaScript, Tailwind CSS, Flutter
Backend:	Node.js, Express.js, RESTful APIs
Databases:	MongoDB Atlas, MySQL
Developer Tools:	GitHub, Postman, Jenkins, Docker
CS Concepts:	Data Structures & Algorithms, SDLC, OOP, Agile method, CI/CD

PROJECTS

AI-Powered Competitive Programming Assistant

React.js, Node.js, CSS3, Express.js, OpenRouter AI

- Competitive programmers on coding platforms wasted time manually searching for hints and explanations across multiple tabs, breaking their problem-solving focus.
- Built a Chrome extension that auto-detects coding problems and delivers AI-powered hints, complexity analysis, and solutions directly within the coding interface.
- Integrated OpenRouter AI API with a progressive hint system using React frontend, structuring responses into hints → algorithm explanation → complexity analysis → full solution on demand.
- Delivered sub-100ms UI response with zero manual setup, enabling uninterrupted in-browser problem-solving across LeetCode and similar platforms.

Full Stack Debt Management Mobile Application

Flutter, Riverpod, Node.js, Express.js, MongoDB Atlas, JWT, REST API, GoRouter

- Retail shop owners tracked customer debts manually using paper or spreadsheets, leading to errors and no real-time visibility into outstanding balances.
- Designed and developed a full-stack mobile application to digitize debt tracking, supporting multiple customer accounts with secure multi-user access.
- Built 10+ JWT-authenticated REST APIs with validation and role-based access control; implemented real-time customer search, auto-balance recalculation using Riverpod, and analytics dashboards for debt tracking and repayment insights.
- Deployed backend on Render with a keep-alive cron-job strategy eliminating cold-start latency, distributed the app via APK, delivering a production-ready debt management solution.

Job Application Tracker with Kanban Workflow

HTML5, CSS3, React.js, Node.js, Express.js, MongoDB Atlas, JWT

- People often lose track of internship applications spread across multiple job platforms, making it difficult to monitor progress, deadlines, and application status.
- Develop a centralized internship tracking platform that enables secure user-specific application management and provides visibility into the entire application pipeline.
- Built and deployed a Website with a Kanban drag-and-drop board using dnd-kit, JWT authentication, role-scoped MongoDB queries, optimistic UI updates, and an analytics dashboard powered by MongoDB aggregation pipelines.
- Enabled efficient tracking across 6 application stages, delivered actionable insights through 4 analytics visualizations, automated deadline reminders via email, and resolved Vercel deployment CORS issues for seamless production use.

EXPERIENCE

M7 Corporation Pvt Ltd

Chennai, India

App Developer Intern

Feb–Mar 2026

- Worked on production software development involving debugging, software testing, issue analysis, QA activities, Git workflows and collaborative Agile development, ensuring reliable application quality.
- Worked with Git, REST APIs, application debugging, software releases and modern development practices while collaborating within an Agile engineering team

EDUCATION

St. Joseph's College of Engineering, Chennai

B.E. Computer Science and Engineering

2022 – 2026

CGPA: 8.56/10

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ problems on LeetCode covering arrays, trees, graphs, and dynamic programming.
- Solved 200+ problems on GeeksforGeeks and 800+ problems on Skillrack
